

Defend Your AWS Cloud with Security Assessment & Readiness Review

Are your AWS environments fully secure, compliant and ready for the future? Don't wait for a breach to find out.

Our comprehensive Security Assessment and Readiness Review identifies vulnerabilities in your current AWS environment – across planning, migration, and operational stages. Get a detailed AWS security assessment report with actionable steps to strengthen your cloud security posture.

Get efficient, prevention-first security for your AWS cloud

Minimize security risks & prevent costly breaches

Optimize your security spend & resource allocation

Meet industry compliance requirements

Proactively identify and address vulnerabilities

What we offer

Security posture assessment with AWS Security Hub, AWS Config, AWS Trusted Advisor

IAM policies, network configuration & data encryption review

Existing security configuration audit against industry best practices such as CIS AWS Foundations, AWS Well-Architected

Compliance evaluation against local regulations (MY PDPA - Personal Data Protection Act, MY RMIT) & global standards (ISO 27001, GDPR)

Your audit will deliver a thorough Security Report with clear next steps & actionable recommendations
